

Access the right information
with Intel's **flash memory**
migration solution website...

intel®

...right now.

intel.com/design/flash/migration

Intel's Flash Memory Migration Solution website makes it easy to find out:

Intel Corporation
1900 Prairie City Road
Folsom, CA 95630

Why

migration to Intel's Flash memory products makes sense. Intel's Flash Memory Migration website is the one-stop answer to all your migration questions, enabling you to quickly take advantage of our latest process technologies, innovative products and software, as well as long term product life support.

How

to migrate to Intel® StrataFlash™ memory and Intel Advanced+ Boot Block memory products. This interactive site has a solution finder tool that guides you to the recommended migration path for certain end-of-life listed products you might be using now.

Where

the necessary documentation can be found. Intel has done the research for you. You'll have quick access to data sheets, application notes, model sheets and technical support documentation that apply to you. Find product overviews as well as information on what software, packaging and design tools work best for the recommend migration path. We've made our knowledge available in one stop at this website, so you don't have to search everywhere for what you need.

Go to

intel.com/design/flash/migration and find what you need in order to migrate with confidence.
